

# VPN Connection Improvement for Vista

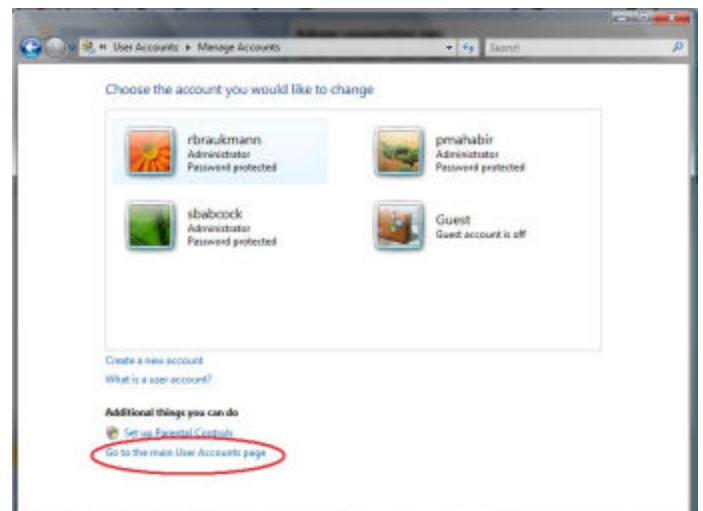

1. Left Click on the Start Icon

2. Select and Left click on Control Panel

3. Under the heading "User Accounts and Family Safety" select and left click on "Add or remove User Accounts"

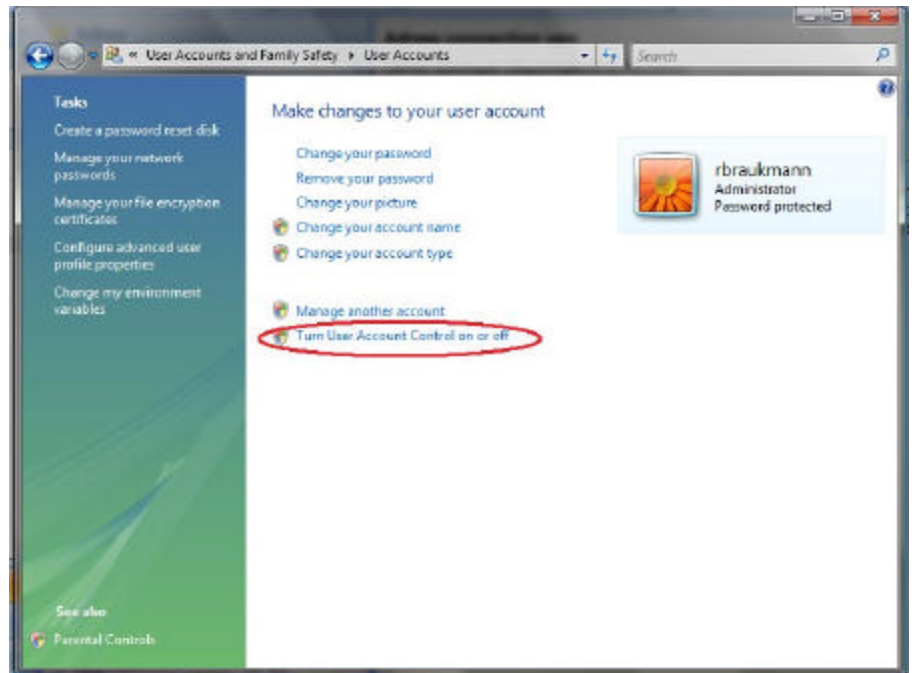

4. Select and Left Click on "Go to main User Account Page"

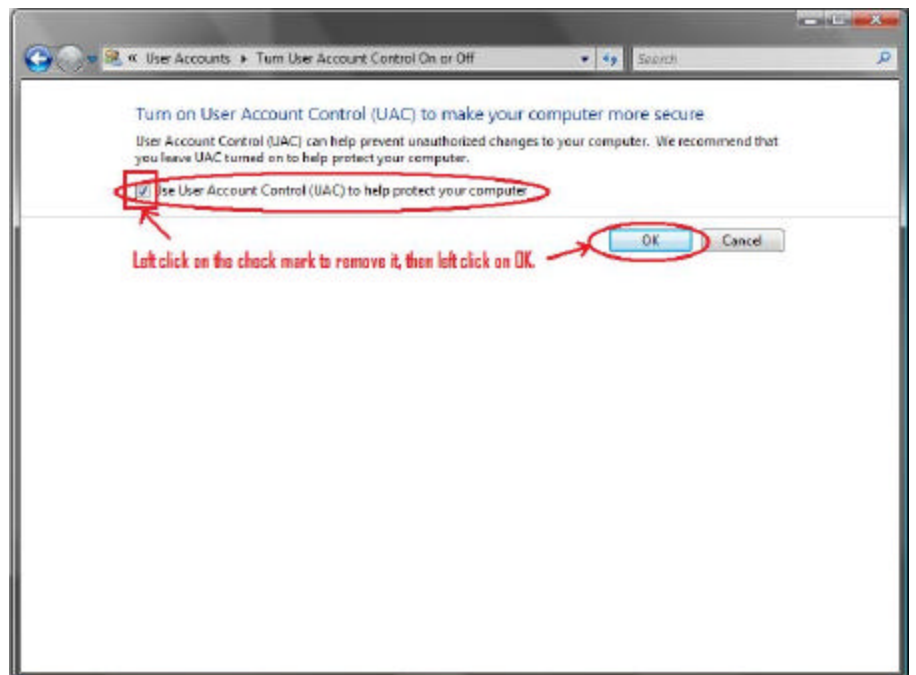

# VPN Connection Improvement for Vista

5. Select and Left Click on "Turn User Account Control on or off"

6. Left Click on the check mark in front of "Use User Account Control (UAC) to help protect your computer" to deselect the option.

7. Left Click on "OK" to exit the screen.

8. Close all other control panel windows.

9. Note: this feature turns off extra security related to the Vista OS Firewall. Quik X users should upgrade their Antivirus software to Norton End-Point-Protection and used the Norton firewall instead of the Windows Vista one. You can contact R. Braukmann if you require the install files.
